

Alley Goop

is a wonderful tool for those that want to create impression of original sculpts or found objects for personal use. Alley Goop is a Silicone Rubber Mold Putty. The final mold is flexible and easy to use.

*Instructions: Mix equal parts of "A" & "B". Knead until both colors are well blended and uniform. Press the item of choice onto the blended Alley Goop or vise versa. Allow to set for 6 minutes and gently remove the item. Mix only the amount you need.
If there is excess oil, dab off with a paper towel.*

Have you noticed when you use a press mold the nose and mouth do not come out as defined as it should? HELPFUL Tip: When applying clay to a face mold create a point on the end of the clay. Dust the mold with talcum powder or a bit of water as a release agent. Place the tip of the clay onto the nose area and press the end of the clay down into the press mold. Gently remove the clay. Works every time ☺

*You can purchase the Alley Goop from Karen at Clay Alley www.clayalley.com
Karen is a wonderful friend and lady. Be sure to check out the rest of her art supplies.*
