

Fiber Optic Kleenex Wings
Supply List

Please Note:

The supply list contains all the items I used to create the wings. By all means add or delete from my list to suit your own creative style. The wings can be made without the fiber optics and any color of paints you may have on hand. In place of the Interference paints, you may use PearlEx powders or any dry pigments you have on hand. The dyes can also be substituted with diluted acrylic paints.
